Tabagan, Ken

In partial fulfillment of academic requirements
for the course
CS 191 Software Engineering I
of the
1st Semester, AY 2019-2020

Unique Reference:

The documents are stored in the [Project Repository Link] referenced with [Filename].

Document Purpose:

This document provides an overview of the use case specification of the use case model. This particular document provides the use case specification for the request notification.

Target Audience:

The target audience includes students from different year levels and faculty, under the Department of Computer Science.

Revision Control:

| Revision Date	Person Responsible	Version Number	Modification
09/23/19	Rog Isidro	1.0	Document edits: including use-case name, description and preconditions. Added flow of events, activity diagram, other diagram. Also edited relationships, postconditions, and special requirements.

Use-Case Name: 4.0 Request Notification

Description: After the student creates or logs in to his account, he will be able to make notification request. He can answer the notification request form and send it to the DCS Codex admin. The DCS Codex admin will then evaluate the request and decide whether to approve or disapprove it.

Preconditions: The student will only be able to make request notification if and only if he has an account.
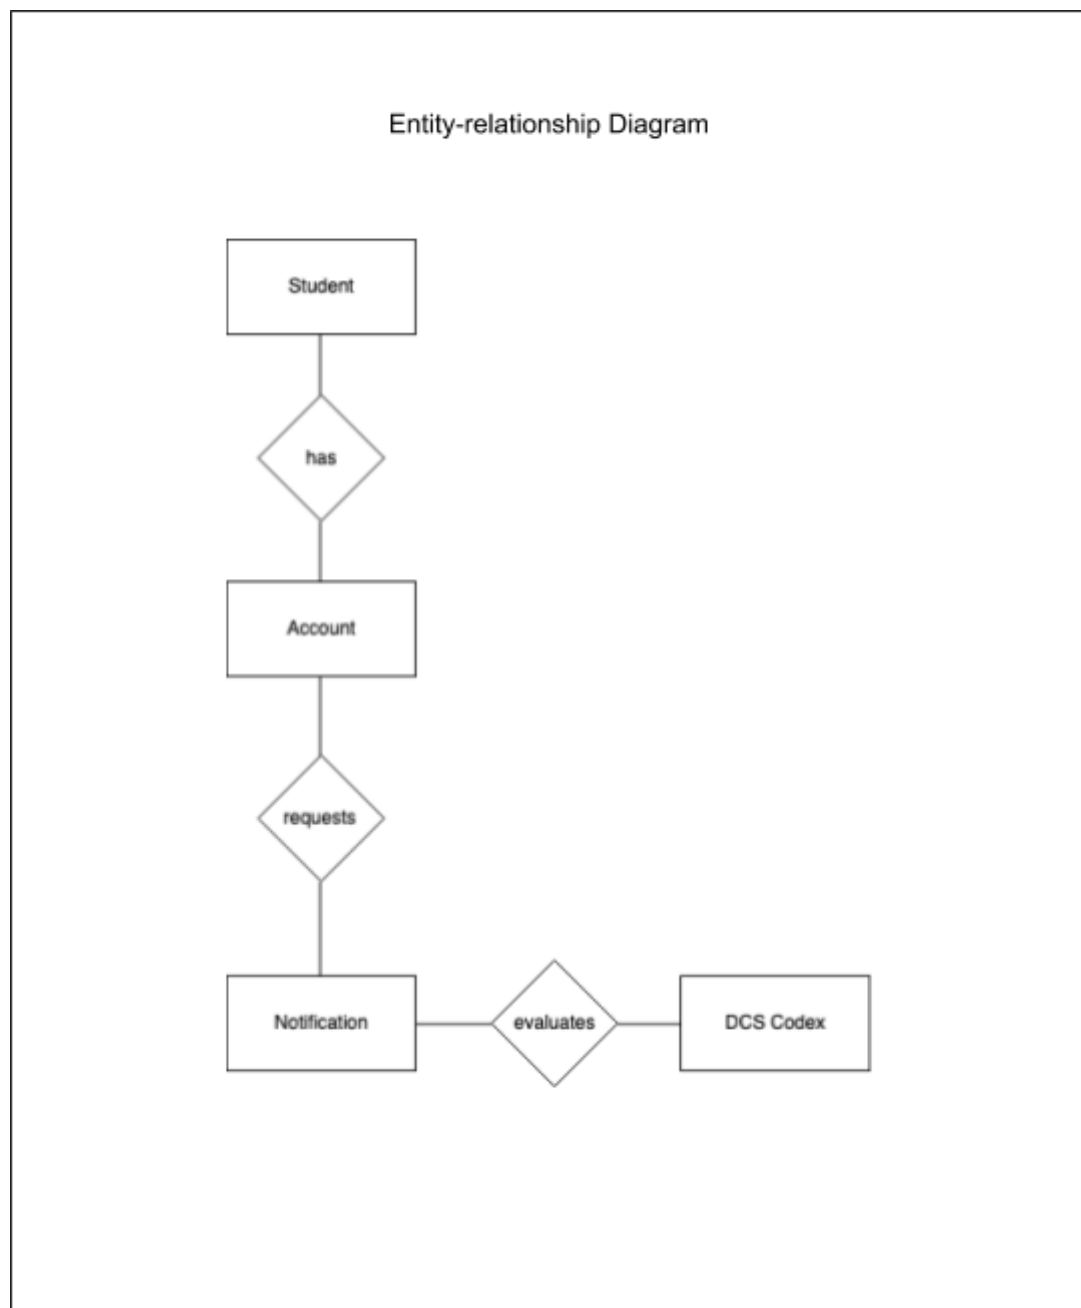

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) Student's notification request got approved.	1. Student registers or logs in to his account. 2. Student makes notification request and sends it to the DCS Codex Admin. 3. The DCS Codex Admin receives the request and evaluates it. 4. If the request is complete, then the admin may proceed in deciding. 5. If the DCS Codex admin approves the request, then he will send approval message to the student sender.
Scenario 2 Student's notification request got disapproved.	1. Student registers or logs in to his account. 2. Student makes notification request and sends it to the DCS Codex Admin. 3. The DCS Codex Admin receives the request and evaluates it. 4. If the request is complete, then the admin may proceed in deciding. 5. If the DCS Codex admin disapproves the request, then he will send disapproval message to the student sender.
Scenario 3 Student's notification request is incomplete.	1. Student registers or logs in to his account. 2. Student makes notification request and sends it to the DCS Codex Admin. 3. The DCS Codex Admin receives the request and evaluates it. 4. If the request is incomplete, then the admin requests for more details or edits in the request. 5. If the request is complete, then the admin proceeds in deciding whether to approve it or disapprove it..

Activity Diagram of the Flow of Events:

Other Diagram:

Entity-relationship Diagram

Postcondition: NONE.

Relationships: The student that has an account may request a notification that will be evaluated by the DCS Codex Admin.

Special Requirements:
        NONE.
